

## *Chargers*

WE SOURCE AND STOCK A WIDE RANGE OF MARINE & INDUSTRIAL CHARGERS.

YOU WILL FIND HERE SOME OF THE ONES THAT WE SUPPLY BUT PLEASE CONTACT US WITH YOUR REQUIREMENTS.

Battery chargers come in two forms; mains powered and DC powered, each having their own specialist characteristics - we supply both.

Deciding how big your charger needs to be is determined by the size and type of your batteries, and whether your vessel has a continuous or intermittent source of AC power to run your charger.

Battery Charger 9994011 for SOLO 461 Battery Charger for Cordless Heat Detector tester

Solo 725 Battery Charger for Cordless Heat Detector tester

M-Power Adaptive Mains Battery Charger 20amps

Cristec HF Switchmode battery chargers

Mass 24V and 48V

Chargemaster 12V and 24V

Easycharge & Easycharge portable

Magnum Energy ME & MSH Series Modified Sine Wave Inverter/Charger

MASTERVOLT MAGIC Series DC-DC Converter, 24/12V, 20A

## INVERTERS

An inverter is used to convert battery DC voltage into mains AC voltage to allow the use of mains powered appliances in a portable environment. A combi is an inverter and charger combined. Pure Sine is used where a digital counter is required (digital washing machine, microwave, clock, etc). Modified sine can be used for all other applications. We can supply both pure sine and modified sine inverters and combis.
